Hanging Basket Care

Sun Basket Care

The most important thing is: Water your basket EVERY DAY! On hot days it may be necessary to water more than once. Fertilize 2 or 3 times a week for maximum blooms. Your sun basket likes sun! Make sure it gets at least 6 hours of sun per day. Pinch off dead blossoms to promote new blooms.

Shade Basket Care

The most important thing is: Water your basket EVERY DAY! On hot days it may be necessary to water more than once. Fertilize 2 or 3 times a week for maximum blooms. Your shade basket likes shade! Make sure it gets mostly shade, no hot afternoon sun! However morning sun is ok for a couple hours. Pinch off dead blossoms to promote new blooms.

Windmill Gardens Hanging Baskets can be found growing in cities from Steilacoom to Kent and beyond. We take great pride in the plants that go into the baskets, and the care required to help our products become full and beautiful.
